EDUCATION

University of California, San Diego — Rady School of Management <i>Master of Science in Business Analytics</i> GPA: 3.6	Jul 2025 – Dec 2026 (Expected) <i>La Jolla, CA</i>
Relevant Coursework: Financial Modeling, Managerial Judgment & Decision Making, Digital Disruption, Business Analytics Consulting, Customer Analytics and AI, SQL and ETL	
Hangzhou City University / University of Waikato (Double Degree) <i>Bachelor of Economics in Finance / Bachelor of Business in Finance</i>	Sep 2021 – Jun 2025 <i>China / New Zealand</i>

PROFESSIONAL EXPERIENCE

Business Analytics Consultant (Capstone Project), GBK Collective <i>Marketing analytics & brand strategy consulting</i>	Mar 2026 – Jun 2026 <i>Los Angeles, CA</i>
- Built an end-to-end Key Driver Analytics workflow for a phone case retail study, reshaping raw survey data into 1,713 long-format records across 8 brands and 12 brand-image dimensions Compared 8 statistical and ML approaches, including standardized regression, Shapley/LMG, random forest, XGBoost, and SHAP; normalized outputs into standardized indices and consensus rankings - Developed a reusable Python and Streamlit analytics tool enabling non-technical users to upload data, select variables and methods, and generate ranked visual reports	
Financial Planning Analyst (Fellowship Program), ChakraTech <i>Sustainable materials & bioprocessing startup</i>	Oct 2025 – Jan 2026 <i>San Diego, CA</i>
- Built the company's first 3-statement model and scenario suite projecting revenue, COGS, and 18-month cash burn; adopted as leadership's planning baseline - Pressure-tested pricing, production-scale, and cost assumptions through scenario and sensitivity analyses; surfaced 3 margin drivers that helped refine 18-month resource allocation and prompted leadership to revisit key trade-offs - Presented capital plan to CEO, translating model outputs into actionable recommendations on runway, funding timing, and resource allocation	
Business Development and M&A Intern, Euclid Vision Group <i>Ophthalmic medical technology company</i>	Jul 2024 – Sep 2024 <i>Shanghai, China</i>
- Assessed 6+ APAC expansion markets across TAM, competitive landscape, channel fit, and regulatory feasibility; recommended Vietnam (est. TAM \$120M+) as the priority market for leadership review - Screened 4 potential M&A targets using comparable-company, ROI, and DCF analysis; assessed competitive positioning, product portfolio, and financial feasibility to support APAC expansion and acquisition-opportunity evaluation - Drafted feasibility reports, presentation materials, and investment memoranda to support internal project evaluation and leadership discussions	
Investment Analyst Intern, Fortune Venture Capital Co., Ltd. <i>State-backed VC investing across technology, healthcare, and energy</i>	Dec 2023 – May 2024 <i>Shenzhen, China</i>
- Built revenue and unit-economics models for 10+ portfolio candidates across TMT, AI, and renewable energy; pressure-tested founder projections by separating validated unit economics from comparable-based assumptions - Contributed to due diligence through stakeholder interviews, competitor research, and operating-data analysis; identified gaps between management narratives and observed unit economics, informing investment committee discussions - Synthesized diligence findings into investment committee memos, clearly outlining key risks, open questions, and evidence-based recommendations to support deal decisions	

AI-INTEGRATED PROJECTS

AI-Augmented Strategic Decoupling Pipeline, Independent Strategy Analytics Project <i>AI co-pilot for competitive strategy · maps value-chain disruption risks</i>	Apr 2026 – Present <i>github.com/Austin-Li7/decoupling-analyst</i>
- Built an AI-assisted strategy research tool that analyzes company exposure to supply-chain, geopolitical, and value-chain disruption risks; decomposed the workflow into 14 typed modules producing evidence-grounded company reports at ~\$0.30/case Provenance checks surfaced a retriever bug causing 40% invalid URLs; fixed at pipeline layer, not prompts - Added a 7-section human review checkpoint gating sources, assumptions, risks, and recommendations before acceptance	
AI-Augmented DCF Valuation Workflow, Independent Finance & Valuation Project <i>AI-assisted investment research workflow for reviewable DCF valuation</i>	Mar 2026 – Present <i>github.com/Austin-Li7/ai-dcf-analyst-coworker</i>
- Decomposed DCF (sourcing → assumptions → projections → sensitivity) with citation-gated AI + human approval per step - Validated on 3 SaaS / TMT companies vs. consensus; traced assumption-level gaps to separate disagreement from AI error	

SPECIALIZED SKILLS

Finance & Modeling: 3-Statement Modeling, DCF Valuation, Comparable Company Analysis, Scenario & Sensitivity Analysis, Budgeting & Forecasting, Variance Analysis, Cash Runway Analysis, Capital Planning, Due Diligence

Programming & Data: Python, R, Stata, Git, Power BI, SQL, Excel

AI Stack: Claude Code, Codex, OpenAI/Anthropic API, Pydantic, ChromaDB, Claude Skills, RAG, MCP

Languages: Mandarin Chinese (Native), English (Fluent)
