San Diego, California +1 (858) 370-8053 chl378@ucsd.edu

EDUCATION

***Master of Science in Business Analytics*,** Rady School of Management July 2025 – Dec 2026 (Expected)
University of California, San Diego, CA

- Relevant Courses: SQL and ETL, Customer Analytics, Business Analytics Consulting, Managerial Judgement/Decision Making

Bachelor of Economics, Major in Finance Sep 2021 – Jun 2025
Hangzhou City University, Hangzhou, China

Bachelor of Business, Major in Finance (Double Degree) Sep 2021 – Jun 2025
University of Waikato, Hamilton, New Zealand

EXPERIENCE

Investment Analyst (Fellowship Program), ChakraTech, Oct 2025 – Jan 2026
Sustainable materials startup focused on bioprocessing technologies San Diego, California

- Built a bottom-up **3-statement financial model** in **Excel** projecting revenue, COGS, and cash burn across base and downside scenarios, establishing the company's first structured financial planning framework.
- Conducted **scenario and sensitivity analyses** on pricing, production scale, and cost structure, isolating 3 key margin drivers that reshaped 18-month resource allocation, cost optimization, and operational priorities.
- Synthesized forecasting outputs into an executive-ready capital plan; delivered **strategic recommendations** on runway, margin outlook, and growth assumptions to the CEO, directly informing budget planning and resource decisions.

***Business Development and M&A Intern*,** Euclid Vision Group**,** July 2024 – Sep 2024
Medical technology company focused on innovative ophthalmic solutions Shanghai, China

- Evaluated 6+ APAC market-entry opportunities by integrating financial, competitive, and macroeconomic datasets in **Excel**, directly informing the **go-to-market strategy** to prioritize Vietnam (est. TAM $120M+).
- Screened and benchmarked 4 acquisition targets using **comparable-company analysis**, **ROI modeling**, and **DCF** frameworks, accelerating the M&A pipeline evaluation cycle by ~30%.
- Authored data-driven investment memoranda and scenario-based feasibility analyses through **cross-functional collaboration**; adopted by senior leadership for go/no-go capital allocation decisions.

***Customer Analytics Intern*,** China UnionPay Zhejiang Branch, Aug 2023 – Sep 2023
Large-scale digital payment platform supporting 300M+ users Hangzhou, China

- Analyzed membership and loyalty datasets using **SQL** and **Excel** across B2B/B2C segments; identified a high-value cohort with 15%+ higher transaction frequency, enabling targeted upsell campaigns.
- Performed cohort segmentation using **SQL** to evaluate retention drivers and churn risk; delivered actionable frameworks to marketing and partnerships teams, optimizing acquisition targeting and partner prioritization.
- Built KPI dashboards in **Power BI** tracking retention, activation, and transaction frequency; delivered weekly insights to cross-functional stakeholders, supporting **data-driven decision-making** on payment growth strategy.

PROJECTS

***Intuit QuickBooks – Upgrade Targeting Strategy*,** UC San Diego Jan 2026 – Feb 2026

- Engineered ZIP-level demographic and behavioral features in **Python (Sklearn, Polars)** to build a profit-optimized targeting model under mailing-cost and margin constraints, maximizing expected profit per customer contacted.
- Benchmarked **Logistic Regression**, **Random Forest**, and **XGBoost** on precision-recall and ROI metrics; selected final model on profit impact over AUC, improving targeting efficiency ~35% vs. baseline.
- Delivered a business-ready scoring framework with segment-level profitability estimates, providing actionable recommendations that maximized campaign ROI within a fixed marketing budget.

Pentathlon – Customer-Level Marketing Optimization, UC San Diego Feb 2026 – Mar 2026

- Built a two-part modeling framework in **Python (Pandas/NumPy/Sklearn)** on 600K records predicting purchase propensity and order size across 7 message options; benchmarked **MLP**, **XGBoost**, **Random Forest**, and **Logistic Regression**, selecting models on out-of-sample performance.
- Constructed a scoring engine computing customer-level expected profit per message combination; developed a personalized targeting policy that outperformed best single-message strategy by 6.47% and random assignment by 15.13%, generating ~€3.29M projected profit at 5M-customer scale.

SPECIALIZED SKILLS

- **Programming**: Python (Pandas/NumPy/Polars/Sklearn), SQL, R, Git, AI Agent (Claude Code, Codex, Copilot)
- **Toolkits**: Power BI, Tableau, Advanced Excel (Pivot Tables, VBA), PowerPoint (Data Storytelling)
- **Analytics & Modeling**: Linear Regression, Logistic Regression, Classification (Random Forest, XGBoost), Time-Series Analysis, Uplift Modeling, Feature Engineering, A/B Testing, Financial Modeling
